

# Student Logo Competition for World Aquaculture 2015 Jeju, Republic of Korea

## GRAND PRIZE:

- FREE 1-YEAR WAS STUDENT MEMBERSHIP
- FREE STUDENT CONFERENCE REGISTRATION TO WORLD AQUACULTURE 2015
- WA15 GIFT BASKET

## 2<sup>nd</sup> and 3<sup>rd</sup> PLACE PRIZES: FREE 1-YEAR WAS STUDENT MEMBERSHIP

The Steering Committee for World Aquaculture 2015 is looking for students to enter a competition in designing the logo that will be used for the World Aquaculture Society's annual meeting in 2015. The conference logo for this event should take into account the theme: "**Aquaculture for healthy people, planet and profit**" and its unique location. Jeju is The Republic of Korea's largest island at approximately 1,800 km<sup>2</sup>, was created millions of years ago from volcanic eruptions, and has a population of 600,000 people. In addition to numerous aquaculture products, it is also home to the world's largest production of cultured olive flounder.

You do not need to be a WAS student member to submit a logo for this competition, just be a student! Logo submissions will be eligible for this competition from **any student** currently enrolled in courses or research hours.

### Logo Submission Specifics:

- The **deadline** for submission(s) will be December 15<sup>th</sup>, 2013.
- Please submit your submission to Dr. Christopher Green electronically via email at [cgreen@agcenter.lsu.edu](mailto:cgreen@agcenter.lsu.edu)
- Designs must be submitted in either JPEG or TIFF format and preferably in color. Submissions can be hand sketched and after evaluation will be submitted to third party graphic designers for construction and finishing.
- In addition to the logo submission, each student must provide **proof of their student status** (Student ID or verification by an advisor).

After the deadline, eligible entries will be evaluated by a panel of WA 2015 Steering Committee members. The winner will be required to sign a release form giving permission for WAS to use the logo in all conference materials and promotions.

For more information or questions, please contact Dr. Christopher Green at [cgreen@agcenter.lsu.edu](mailto:cgreen@agcenter.lsu.edu)
